Porta John® Golf Course Proprietary Play-Through Porta John®

Fig.1 - Golf Course Lavatory Building

Fig.2 Patented Water Saving Toilet

Fig.3 Patented No Flush Urinal

Fig. 4 Model 4848EHD

We are now marketing the [Play-Through-Comfort Station](#). This product increases the speed in which golfers can play the golf course in a very upscale way as the ladies do not have to return to the clubhouse to use the lavatory.

Fig. 1 Pictures one customer's solution.

Fig. 2 A water saving cistern that replaces the sink and allows the same water to be used twice - first to wash hands and second to flush the toilet.

Fig. 3 Displays the no flush urinal which reduces the men's unit water usage by 60%.

Fig. 4 Displays the many features of the [Model 4848EHD](#).

The golf course owner's motivation to install the comfort stations is to reduce the players' trips to the clubhouse for those players who will not use the portable toilets. This will speed up play and increase course revenue. The golf course play through toilet marketing potential will yield considerable marketing and revenue advantages. We have significant experience manufacturing this product.
